

Product: Tripod
Job: Shrink wrapping
Users: Professional

The main purpose of the tripod is to separate heat-shrinkable film of the boat it covers. By combining the use of strapping, buckles, and tensioning .It's a simple protection.

The advantage of this separation is to promote the circulation of air and protect the surface on painted hulls of boats or machines. The airflow is extremely important on painted hulls where the heat shrink film can touch and cause blisters , you avoid to damage the surface during storage and transportation

Description

- plastic part
- Strapable in both directions at the top
- silicone feet to protect surface

Advantages

- Protects painted surfaces
- Allow air to circulate around a protected boat or any object.
- Avoid condensation
- Avoid mildew
- Has silicone feet respecting the objects to be protected
- Reusable after dismantling

Settle

- Using strap
- Place the strapping
- In the cross put the spacer
- then stretch
- you can slip the heat shrinkable film of laying operation

Packaging

Packaging 20 pieces in a plastic bag
