

Product: Louver vent
Job: Heat shrinking
Users: Professional

This vent installed on the film allows for a continuous renewal of air inside the boat or a damp room. It can act against the moisture or odors. The air can circulate.

This vent is the fastest shrink wrap vent on the market. Designed with sharp teeth to help pierce the plastic, simply push down and twist. The body comes with weather resistant adhesive to last through heavy rain and winter.

Description

- self-adhesive ventilation for heat shrink facilities
- For marine
- Large volumes for logistics
Material: lightweight and durable plastic
- Two-Sided, Sharper Self piercing teeth
- Pre-installed adhesive to stick directly on shrink wrap cover
- Easy to use 2 piece design

Advantages

- Avoid condensation
- Avoid moldew
- Avoid unpleasant odors
- Deliver air

Pose

- Easy Steps
 1. Pop the top of the vent off to expose the self-piercing / cutting teeth.
 2. Push the teeth into the shrink wrap and twist
 3. Remove wax paper to expose adhesive. Then install vent by pressing firmly on the shrink wrap

Packaging

10 parts in a plastic bag
