

Product: Zerust capsules
Job: Winter storage / packaging / containment
Users: Professional

Description

Zerust® capsules are easy-to-use diffusers. They emit corrosion inhibiting molecules that settle on metal surfaces and protect them from corrosion.

Zerust® capsules are designed to work in restricted spaces. They are residue-free and provide protection for electronic equipment. These capsules do not interfere with the electrical conductivity or resistance of the contact surfaces. They provide simple and effective protection for electrical components in sealed enclosures.

The adhesive tape on the back of each capsule makes it easy to place them on any available surface in an electrical enclosure.

Once removed from its packaging, the Zerust capsule releases inhibiting molecules that evaporate and condense on clean metal surfaces, forming a stable protective layer that protects them from corrosion.

The inhibitors have no negative affect on metal surfaces or their electrical properties.

Benefits

- Protection against corrosion
 - Easy to use
 - Can be placed in small spaces
 - No danger for electronics
 - Improves the reliability and availability of equipment
- Benefits** • Reduces the need for inspection and repairs

Safety

- Safe for health, non-toxic and presents no risk in the event of contact with the skin or inhalation
- No requirement for surveillance as per the standard TRGS 615 and no restriction on use as per standard TRGS 900
- Complies with REACH regulations

Technical information

MAIN CHARACTERISTICS

Zerust® capsules release volatile corrosion inhibitor (VCI) molecules.

They are odourless and provide dry protection.

FORMATION OF THE PROTECTIVE LAYER

Between 30 minutes and 3 hours, depending on the size of the capsule.

STORAGE

While kept in their hermetically sealed original packaging zerust capsules may be stored for 2 years. Stoaway from light, humidity and dust and at a temperature of between 0 and 40 °C

DISPOSAL

- Recyclable
- Household waste disposal channel
- Can be incinerated

DURATION OF PROTECTION

See table below

Installation

Zerust® capsules can be installed in a matter of seconds and require no tools or expertise. Simply remove the protective film on the adhesive tape and apply the capsule to the surface.

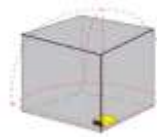

Corner positioning

Central positioning

Side positioning

Cat. No.	Title	Qty	Gencod
44744	Zerust capsule VCI for electrical enclosures - Provides up to 1 year of protection within a 1.8 m radius	1	3189640447448
44745	Zerust capsule VCI for electrical enclosures - Provides up to 2 years of protection within a 0.6 m radius	1	3189640447455
44746	Zerust capsule VCI for electrical enclosures - Provides up to 2 years of protection within a 0.6 m radius	5	3189640447462
